PROFILE

Frontend-focused software engineer with 6+ years of experience building scalable, high-quality web and mobile applications using React, React Native, and modern JavaScript technologies. Known for delivering elegant, maintainable code and driving performance improvements. Equally comfortable working solo or within agile, cross-functional teams.

TECH STACK

- **Languages & Frameworks:** Javascript, Typescript, React, React Native, Next.js, Redux, Node.js, Python, GraphQL
- **Styling:** CSS, Tailwind, SCSS, Styled-components, Material UI, PrimeReact
- **Animation:** GSAP, Framer Motion
- **Tools:** Git, Github, Docker, Azure, Jenkins, Jira, Confluence, Expo, Posthog
- **Testing:** Jest, React Testing Library, Cypress, TDD, Playwright

PROFESSIONAL EXPERIENCE

React Native Developer | Distributed Technologies Research

Oct 2024 – Apr 2025

- Developed a cross-platform mobile app (Unit-e) for international, crypto-based money transfers using React Native.
- Implemented biometric and passcode authentication, enhancing app security.
- Collaborated with product and QA teams to ship features rapidly in a high-paced startup environment.
- Resolved platform-specific bugs for iOS and Android, ensuring consistent performance.

React Developer | Financial Times

Sep 2024 – Oct 2024

- Built an interactive energy client web page using React, Tailwind CSS, GSAP, and Lottie animations.
- Translated detailed Figma designs into responsive, animated UI within a 2-week freelance contract.

React Developer | Shell

January 2023 – Mar 2024

- Built internal tools for LNG (Liquified Natural Gas) traders using React, TypeScript, and Ag-grid.
- Led development of UI for user access management and Pricing modules.
- Contributed to backend services using Python, including API development and database integration.
- Introduced agile practices that improved team velocity by 15%.

Frontend React/React Native Developer | Nexus Mods

Jan 2022 – Dec 2022

- Developed new UI components using React, TypeScript, Tailwind; improved UX across the site.
- Maintained 90%+ test coverage using Jest and React Testing Library.
- Led frontend GraphQL integration and contributed to open-source UI component library.
- Explored mobile concepts using React Native.

Full-stack Software Engineer | BuzzFeed

Mar 2021 – Jan 2022

- Delivered animated React/Next.js quiz features that increased user re-engagement by 6%.
- Built newsletter management app using Redux and Node.js.
- Mentored junior devs and contributed to cross-team initiatives during Hack Week.
- Integrated React Native features in the BuzzFeed mobile app.

Full-stack Software Engineer | Deutsche Bank

Jan 2020 – Mar 2021

- Led frontend and backend work on internal regulatory apps using React, Scala, and Node.js.
- Built event retry system adopted by 7+ teams; improved data reliability.
- Managed CI/CD pipelines with Jenkins and OpenShift.
- Worked closely with stakeholders and designers to meet MiFID compliance.

Frontend Developer | Ministry of Justice

Jan 2019 – Sep 2019

- Developed reusable UI components in AngularJS for CJSCP platform.
- Followed GDS standards and TDD practices.
- Collaborated across QA, product, and UX teams in an agile setting.

PROFESSIONAL QUALIFICATIONS/CERTIFICATES

- Full-Stack Software Developer Bootcamp – Nology (14 Weeks)
- Microsoft Azure Fundamentals – AZ-900
- APMG Agile Foundation & Practitioner Certifications
